Discover the freedom of productivity

As business moves faster, we're all using mobile devices to keep pace — changing how we work, and in many cases, where we work. Ricoh continues to do its part, with new innovations offering more freedom and agility, so you can perform more everyday tasks in less time. Looking for color wireless printing? Choose the RICOH® SP C252DN and produce professional-quality documents from your desktop. Need to share documents quickly with coworkers and customers? Add copying, scanning, faxing and more with the Ricoh SP C252SF. Tight on space? These desktop devices are small enough to fit in cramped spaces, making them convenient for smaller offices. You can even include them as part of a Ricoh Managed Document Services (MDS) strategy and measure how much time and money they can save for your organization.

Work quickly, from anywhere

Complete more office tasks in less time. Black-and-white and color pages print at 21 pages per minute, and first prints are available in only 14 seconds, so you can complete even large print jobs quickly. The Ricoh SP C252DN/SP C252SF comes standard with secure IEEE 802.11b/g/n Wireless LAN connectivity, so you can put it on the desk, in a cabinet or under the counter with ease, and without an unsightly tangle of cords. Download the Ricoh Smart Device Print&Scan app and print directly from your personal mobile device. Or, take your work with you. Use the strategically placed USB port on the front of the device to share information with a wide range of scan-to options (SP C252SF); and simply connect your digital camera to print images without a computer.

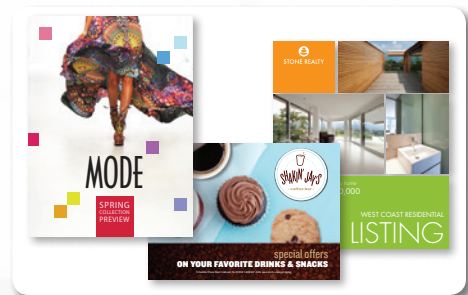

Save space, save time

From the corner office to the corner store, the Ricoh SP C252DN/SP C252SF fits almost any workspace. Choose tasks, check settings and move to the next job in moments using the intuitive LCD display on the control panel. You can even choose frequently used tasks with one-touch control for incredible speed and convenience. Changing cartridges is just as easy. The all-in-one print cartridges can be replaced by anyone, without any training or mess.

Produce quality color at an affordable price

Color can make everyday business documents more dynamic and compelling. The Ricoh SP C252DN/SP C252SF makes color more affordable, too. In Economy Color Mode, you can print text at full density, but use less toner for images to significantly reduce cost-per-page. When you need sharper lines, more precise text and vibrant colors, the device offers true 600 x 600 dpi resolution. Need to print a professional-looking document without outsourcing? Print at even higher resolutions up to 2,400 x 600 dpi for business presentations that require eye-catching, higher quality graphics.

Versatile, fully featured performance for small offices

Perform every task with ease

Whether you're printing documents, or sharing them with others, the Ricoh SP C252SF lets you have it all in a single, compact device. Share full-color documents using a wide range of scan-to options. Use the 35-Sheet Automatic Document Feeder to manage multiple-page documents quickly. Store up to 200 speed dial entries and send secure faxes to frequent recipients quickly using one-touch control keys. You can even copy two-sided documents, such as drivers' licenses, insurance cards and more, onto a single side of a sheet of paper using the ID Card Copy feature.

Add value in and out of the office

Looking for a powerful, versatile device that's as friendly to the environment as it is to your budget? Choose the Ricoh SP C252DN/ SP C252SF for low hardware costs along with superior cost per page savings. Print on both sides of paper with duplex printing and save on paper costs. Use less energy while taking advantage of this ENERGY STAR™ certified device's low typical electricity consumption (TEC) value. Plus, take advantage of our consumables recycling programs to promote a resource recirculating society.

Protect sensitive information

Information is the most important asset in your office. Protect it with advanced user authentication controls. Store every document securely until an authorized user enters the correct PIN from the Ricoh SP C252DN/SP C252SF control panel. No more sensitive information is left unattended in the output tray for any passersby to read. Worried about supply levels or need to check network settings? Use Web Image Monitor to resolve maintenance issues — and even prevent them.

Incredible ease of use and convenience

Simplify your workload with unmatched convenience that builds on Ricoh's legacy of affordable, timesaving innovations for the workplace. Complete a wide range of tasks with a single touch using the intuitive control panel with LCD screen. Check supply status and make corrections directly at the device. Use Web Image Monitor to perform many of the same tasks remotely. You can also change the top-loading, all-in-one print cartridges in moments without help — and without a mess.
