Epson **Stylus Photo PX830FWD**

For the home user who wants it all, the Epson Stylus Photo PX830FWD is the top-of-the-range 4-in-1 that prints photos as well as home documents and can scan, copy and fax while offering a large selection of top-of-the-range features.

The automatic Wi-Fi set-up[3] makes configuring laptops and computers to print wirelessly easy. Users don't need to know their network settings or connect with a USB cable, the PX830FWD automatically finds the relevant connection settings in order to configure itself. Multiple users then have the freedom to print, scan, copy and fax quickly and efficiently from anywhere in the home.

The PX830FWD comes with Epson Connect which offers even more flexibility and freedom, allowing users to quickly and easily print photos and documents wirelessly from smartphones and tablet PCs[2].

The large 19.8cm touch-panel with integrated touch-screen, that guides users through any task, and accompanying PictBridge and memory card slots offer easy-to-use PC-free photo printing.

Multi-page documents can be scanned, copied and faxed when fed through the Automatic Document Feeder (ADF) which tidily folds away when not in use. Paper is neatly stored away in the PX830FWD's front-loading dual paper trays, offering easy access. The fast print speeds and double sided document printing also make this an efficient printer for around the home.

Claria Photographic Ink has been developed to be the ideal partner for the latest DSLR and compact cameras, to give better-than-lab-quality prints. The dye-based ink works to give high definition results every time but is also versatile enough to ensure the whole household can use it for their non-photo printing needs. Users get great value with a choice of cartridge sizes[4] and individual inks; they only need to replace the colour used.
